AGENT FOR

The Advance Threshing Machinery.

The best and instatt thresher in America, and a machine that wands without a rival. The ADVANCE Thresher has NEVER been REPLACED by any other machine on the Coast, but has replaced several others that HAVE FAILED to fill WAR-RANTEE. Why get some OLD STYLE machine because it is cheap when you can get an ADVANCE on the start and do good work in any kind of grain. You do not have to cut and try with the ADVANCE, but start your power, then commence threshing at once. I take the liberty of referring you to the following parties owning ADVANCE Threshers (without their knowledge). Dr. H. A. Davis, Harrisburg, after wasting most of the season trying to run a cheap machine, bought an ADVANCE and averaged 2206 bushels per day. M. F. White & Co., Dixia, same oxperience, but after getting an ADVANCE averaged 2246 bushels per day. Knox Bros, Albany, with a little 28 inch machine averaged 1650½ bushels per day. Henry T. Bold, Spangle, winters, after trying a — machine the beat part of the season bought an ADVANCE. Was then able to run without a blacksmith and carpenter shop. The ENGINE is guaranteed to pull more than any other, and will outravel all others on the road. If you hear any loud boasts, please tell the parties the ADVANCE THRESHER and ENGINE are sold on their merits entirely. And I am wiffing to prove all I claim in any field at any time. Do not be humburged by ouying any machine until you see the ADVANCE. I also handle steam fitting goods iron pipe, laundry machinery and inany other specialties. Send for catalogue of what, ou want.

Delayed for Lack of Funds.

LITLE ROCK, May 7 -1; is probable that the conclusion of the Woodruff county case in the Federal cour will end the briminal prosecutions before Judge Caldwell This morning it was an nounced that the appropriations for the payment of the witnesses in the government cases had been exhausted. A letter to that effect has been received from the attorney general by United States Marshat S. Hellman.

In stummber on the matter, Jedge Caldwell said Marshal S. Hellman.
In stumming up the matter, Judge Caldwell said
that the prosecution of the government criminal
tracesses was practically ended and that the grand
tury would be displayed because no further

You must remember that Buller and Porter are not iftends. Butler has hated Porter ever since the James river affair when Porter ever since the James river affair when Porter said Butler was like a man who was corked up."

Another officer also dealed the truth of Butler's statement and said it could only be accounted for by the hilarity arising from the reunion and the feelings of giory aroused in the breast of the general by the praise of his friends. It was not the first time that Butler had made the charge aithough years ago it was conclusively proved to be groundless.

ELECTRIC POWER.

Thereforement of electric power is yet in its infancy. But it has made progress enough to indicate very clearly that it is destined to produce there changes in the industrial affairs and conomic conditions of civilized life than have been produced hitherto by any agency of force that has been brought under the control of man. The progress that has been made so far in turning electrical energy to the service of man makes it certain that its use will become practically illimitable. Its possibilities are yet and probably will remain for a long period, beyond human Development of electric power is yet in its Its possibilities are yet and probably will remain for a long period, beyond human

TO EAST PORTLAND.

This magnificent property comprises 1400 lots and lies immediately between the city of East Portland (population 12,000) on the couth and the city of Albina (population 4000) on the north, being really a "reserve" between two populous centers with a combined population of SIXTEEN THOUSAND. It is high, commanding a view of the entire cities of Portland, East Portland and Albina and is reached by the street cars of the Willamette Bridge Railway Co. from either Portland or East Portland. This company is now operating two lines of street cars, one running north from Holladay's addition, through the heart of East Portland, across the Morrison street bridge, and the other running due west across the new steel bridge, both lines terminating in Portland. In addition to these two lines the cars of the Vancouver motor line run directly through Holladay's addition from north to south. The property can a so be easily reached from the "west side" by either the Southern Pacific Railroad Company's steam ferry or by the small ferries running from Portland to Albina. Some of the finest residences on the "east side" are located in this addition. Many of the most prominent residents of Portland and East Portland are now purchasing properly in Holladay's addition and many elegant and substantial residences will be constructed there during the coming year. A magnificent Boulevard, Holladay avenue, 100 feet wide; cuts through the entire property from west to east, and is now one of the most popular drives out of the city. This connects with the new steel railroad and wagon bridge (spanning the Willamette) on the west, thus giving easy access into Portland from this most desirable property. Address or call on

"

A DARGEBOUG BESTONNISILETY. The promerity of the American Unida is a that and its stability for the lature spens as firmly assured as that of any nation of the globe, but this was not the situation when Washington was called to the presidency. Our situation at that time was so desperate Shoetigh social disorder, political discontent and unaucial weakness, that our best friends smong the political thinkerr of Europe pre-dicted the failure of our experiment and our altimate application to Ingland for re-an-meration to her empire. Frederick the Great of Prussis, an able man and our warm friend, predicted the speedy failure of our political experiment. With the removal of the stress of war which pressed the thirteen colonies together, they began to grow discontented. The continental durrency was worthfess, half the states had issued nav money and in nearly all of them barter had been resorted to as the method of exchange. The individual states had little credit at bonie, and none abroad. The confederation was so utterly bankrupt that in 1784 it could borrow only \$300,000 at exorbitant interest from the bankers of Amsterdam, and in 1786 we were so poor that we had to submit to the empture of American ships by prates, and the enslavement of American seamen; for we had no money to ransom our citisens, no navy to compel their release. The continental army had been d smissed unpaid and we owed France a great debt with no prospects of payment. The average annual tax in Massachusetts imposed upon the head of a household was \$200 a sum that exceeded the farmer's annual income. There was a litter quarrel between Connection and Pennsylvania, because of the cruel treatment of New England emigrants by the treatment of New England Supplies of the Hatter state. The contest between New York and New Hampshire concerning the ownership of the "New Hampshire grants," now known as Vermont, was so violent that preliminary negotiations were entered into be-tween the fathers of Vermont and General Haldman, of Canada, looking to annexation with Canada rather than submission to the authority of New York. Connecticut imposed duties upon imports from Massa-chusetts; Pennsylvania taxed interstate commerce with New Jersey and Deia-ware. A member of the Virginia assembly advocated the encouragement of the British rether than the New England marine—so strong was sectional feeling at that early day. New York by a navigation set and a protective taruff discriminated against New Jersey and Connecticut, and by way of reprisal New Jersey taxed the lighthouse built by the city of New York at Bandy Hook, and the merchants of Connecti-

of \$170,000,000. In 1786 Managehasette, an exceptionally rich and prosperous state, owed the Federal government \$7,000,000. The constitution, under which Washington became president, was only adopted after bitter opposition and by a small majority in many states. Samuel Adame, Patrick Henry and Richard Henry Lee refused to attend the convention that passed it; Ystes and Lansing of New York soon left it, while Gerry of Massachusetts, and Mason and Randolph of Virginia refused to approve by their signature the result of its deliberations, Massachusetts raisfied it by a majority in convention of only nineteen. In Maryland the great lawyers Luther Martin and Samuel Chase opposed it. In South Carolina it was opposed by the sevolutionary hero, General Sanuter. New Hampshire agested to it by a majority in convention of discover by "testings" whether the miracle and increased usefulness of the entargram is assured.

THE LEAD INDUSTRY.

There is a law on the statute book for protection of the producers of lead in the United States; but the freesury department during several years has given an interpre-tation to the law which practically mullifies its protective feature. The duty on lead is 1½ cents a pound, but under the rulings of the department silled orescontaining silver of greater value than the lead they been allowed to come in free of res in free, since the government has estab-ished no tests and the word of the importer

of the ores.

This is a great hardship upon the producers of lead throughout the United States. It has cut them off from the protection to which their industry is fairly entitled by law, and has reduced the lead market to a point that is relinous to the mining interests of our Northwestern states and territories. our Northwestern states and territories.

Inaugural Address of the New Governor of the Territory. "

Statehood the Keynote for the Future-The Calling of a Constitutional Convention Approved.

Governor Shoup, of Idsho, on assuming the duties of his office a few days ago issued an address, from which we make the following extracts; Idaho was by act of congress created a territory March z. 1862, from parts of Dakots, Nebraska and

would now have a population of about 250,000 souls.
We have, however, lost a large portion of our original heritory, and with it a proportionate amount of population.
The fair and prosperous ferritory of Montana, which will soon become a stake-adding another originst are to the cluster on our national dag—was taken from Iduho. A large portion of the erritory of Wyoming was also taken from us, leaving us to-day with about 35,900 square mites. In 1861 the first settlements were passed in Idaho, coincosed principally of hardy miners from California and Oregon. Their vocation was placer mining; no one had come to remain. Each man came with the injection of soon returning to his former home. His contemplated stay depended on the refuness of his claim and, the amount leminst an unmulate as a stake to carry back. Thus you will see that the first influx of people to Idaho were of the adventurescene class, who did not come with the intention of remaining or to the

we reasons:

First—That congress is ripe for and carnestly
desires our admission into the Union of states.

Second—That they do not look upon our admission as a political move. You will note that the
reports of these committees are unanimous. On
one of these committees the democrate have a
majority: on the other the republicans have it. I
can state as a further evidence that congress looks

The people, who can always be trusted when left to their own justement, will send their best men to this couvention. I am confident they will send the best available men from their respective counties, avoiding parilsamship as much as possible, and looking only to the ability and fitness of delegates to perform the important work of preparing a good constitution, which must be in accord with the constitution of the United States, and which should throw all the necessary safeguards around our industries and institutions.

dependence. The delegates to this convention should be men of ability and integrity, who will prepare and present to the people for ratification the best constitution ever made. In the selection of delegate the question of politics should be ignored. Unless it he to make a friendly division there should be no notificed in a constitution convention.

For quick raising, the Royal Baking Powder is superior to all other leavening agents. It is absolutely pure and wholesome and of the highest cavening power. 🗓 is always purform in strength and quality and never falls to make light, sweet, most palatable and nutritive food. Bread, biscuits, multips, cake, etc., raised with Royal Baking Powder may be eaten hot without distressing results to the most delicate digestive organs. It will keep in any climate without deterioration.

Prof. H. A. Mott, U. S. Government Chemist, after exactining officially the principal baking powders of the country, reported:

tests made both for that company and the United States Government.

"Because of the facilities that company have for obtaining perfectly pure cream of tartar, and for other reasons dependent upon the proper proportions of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable briding powder offered to the public.
